

EXPERIENCE

CalMatters - Data Reporter (Contractor)

May 2026 - Present

- Lead designer and developer on a series of interactive quizzes for California's upcoming Nov. elections. Project focused on informing readers about ballot measures and helping them decide how to vote.
- Translating complex, dense politics into easy-to-understand and engaging storytelling.
- Identifying common needs in team's Github templates and building reusable components to fill gaps.
- Redesigning dashboards/trackers for California wildfires and droughts.

The Pudding/Polygraph - Designer & Illustrator (Project-based Contractor)

March 2026 - May 2026

- The Pudding and Polygraph are sister companies run by the same team. The former explains culture through visual essays/data journalism. The latter is a design studio working with commercial clients.
- The Pudding: Designed and illustrated a visual story analyzing 200,000 similes from popular fiction. Developed visual theme of project and worked as a front-end developer to build the page.
- Polygraph: Worked with a non-profit (client confidential) to build an interactive story walking readers through complex, population-based datasets. Designed and built out UI for database dashboard.

The Washington Post - Graphics Reporter

July 2014 - Feb 2026

- Designed and developed interactive graphics, story templates, and data visualizations for daily/breaking news and long-term projects. Includes reporting and writing articles alongside making the visuals.
- Focus on integrated storytelling, blending visual media and tech to bring stories to audiences in new ways.
- Data analysis and reporting, working with reporters/editors to transform datasets into reader-focused visual stories.
- Illustration work, varying from realistic to stylized depending on design needs.
- As the Style/Features beat coordinator, acted as the primary liaison between the Graphics and Arts & Entertainment departments, using news judgment to determine which stories to focus on, and educating other departments on the role of visual journalism.
- From 2014-2016, worked as part of the Interactives Story team to experiment with storytelling methods. Created reusable templates and tools from successful projects to ease the workflow of the Graphics team.

NPR - News Applications/Visuals Intern

Sept 2013 - Dec 2013

- Designed and built full-stack, multiplatform web apps for interactive storytelling. Work included front-end and some back-end programming; wireframing and UI design; and deployment.
- Specialized in design, from paper prototyping, to digital mock-ups, to front-end programming.

EDUCATION

Northwestern University, **B.S. in Journalism**
Second major in **Art Theory & Practice**

AWARDS & HONORS

Multiple SND design awards (2015-20, '23-'26)
Malofiej Award (2016)
James Beard Award nominee - Innovative Storytelling ('18, '20)
National Edward R. Murrow Award - Reporting: Hard News (2017)

TOOLKIT & SKILLS

Design: Adobe Illustrator, Photoshop, InDesign, Figma, Affinity
Visualization: D3, Datawrapper, Ai2Html, SVG
Data Analysis: Excel, Google Sheets, Python
Development: HTML, CSS, Javascript, React, Svelte
Illustration: Fine art background in drafting and painting. Digital work in Photoshop, Illustrator, ProCreate.
3D Modeling/Animation: (Intermediate) Spline, After Effects
Writing/Reporting: Experienced in writing on deadline and building a network of sources.
